EDUCATION

University of California, San Diego — San Diego, CA
B.S. in Data Science — GPA: 3.83 / 4.00 — *Sep. 2023 – Expected June 2029*
Minor: Technology, Innovation and Supply Chain

EXPERIENCE

T1 (SK Telecom Esports Organization) — Seoul, KR
IT Operations Intern — Operations Department — *Mar. 2026 – Aug. 2026*

- Automated monthly utility-bill collection across 25 player accommodations — roughly 100 water, gas, electricity, and internet statements a month — parsing encrypted email and crawling no-API vendor portals via headless browsing; cut ~15 hours of manual work per month and added a dashboard comparing cost by utility and period
- Built an HR operations dashboard covering ~100 employees, tracking core-hours compliance, remaining annual overtime, and the frequency and stated rationale of work-hour edits from Flex attendance data; automated the monthly overtime notices sent to every director and team lead
- Advised the C-suite on enterprise AI adoption — scoping RPA versus agentic automation, security exposure, and vendor cost and ROI comparison — after interviewing every team lead to identify the highest-value processes to automate
- Authored the company's AI governance materials (prompting standards and code of conduct) and led prompt-engineering and AI security training for 100 employees
- Helped establish the company's first KPI framework for support departments, interviewing every team lead and converting the qualitative performance attributes they proposed into measurable quantitative metrics
- Shipped three Google Apps Script tools syncing Sheets and Discord for the academy team, routing around Google IP throttling with a Cloudflare proxy layer

Republic of Korea Army — Aug. 2024 – Feb. 2026
Korea Defense Intelligence Command (KDIC)

- Led 50+ soldiers through training cycles and duty rotations across 18 months of mandatory national service, in an intelligence unit requiring strict information-handling discipline

KSEA (Korean-American Scientists and Engineers Association) — Sep. 2023 – June 2024
Finance Team Member

- Managed financial planning and budgeting for a campus event; wrote a successful funding proposal to KSEA headquarters in Virginia, securing the full requested amount

PROJECTS

T1 Basecamp Cafe Sticker Campaign
JavaScript, web deployment, QR integration — built during T1 internship

- Designed and deployed a live consumer web app: cafe drink stickers carried a randomized "daily tier" and a QR code linking to detailed fortune metrics and promotional content

Calorie Prediction Model
Python, pandas, NumPy, scikit-learn, seaborn, matplotlib

- Built a time-series model predicting calorie expenditure from heart rate, steps, MET value, intensity, and weight; R-squared = 0.97, MAE = 0.105

Activity Classification Model
Python, pandas, NumPy, scikit-learn

- Classified walking, running, and cycling from accelerometer data with a random forest; performed feature engineering and model evaluation. Accuracy = 92.6%

TECHNICAL SKILLS

Programming: Python, R, SQL, Java, JavaScript (Google Apps Script), HTML/CSS, Git
Data & Analytics: pandas, NumPy, scikit-learn, Jupyter, Excel, Google Sheets, dashboard development
Automation & Web: web crawling and parsing, headless browsing, REST APIs, Discord API, Cloudflare
Machine Learning: Linear Regression, Random Forest, Time-Series Modeling

CERTIFICATES

SQLD (SQL Developer), Korea Data Agency — June 2025
ADsP (Advanced Data Analytics Semi-Professional), Korea Data Agency — March 2025
